

ALGE-TIMING Tennis Scoreboards are used with big success at all tournament levels from the local club tournament up to GP-tournaments or Davis Cup. The scoreboard is controlled by a terminal with "intelligent tennis software". You key in who made the point and the rest is done by the controller. If the score is 6 to 6, the terminal asks you if you want to continue with a tiebreak or if you want an open end set.

LED Tennis Scoreboards have some advantages compared to electromagnetic display boards. First of all, they operate totally silent. This means you do not hear any sound of a moving digit. It is also possible to adjust the brightness in 9 levels. This helps to see the board in bright sunshine as well as in a dark indoor facility or at night.

ALGE-TIMING can offer many different tennis scoreboard models. We are also happy to help you with custom designed tennis scoreboard solutions.

LED Tennis Scoreboard Models:

Tennis Scoreboard D-TA615:

Figure Height: 15 cm
Max. readability: about 70 m
Score: 3 sets

Tennis Scoreboard D-TA625:

Figure Height: 25 cm
Max. readability: about 120 m
Score: 3 sets

Tennis Scoreboard D-TA645:

Figure Height: 45 cm
Max. readability: about 200 m
Score: 3 sets

Tennis Scoreboard D-TA815:

Figure Height: 15 cm
Max. readability: about 70 m
Score: 5 sets

Tennis Scoreboard D-TA825:

Figure Height: 25 cm
Max. readability: about 120 m
Score: 5 sets

Tennis Scoreboard D-TA845:

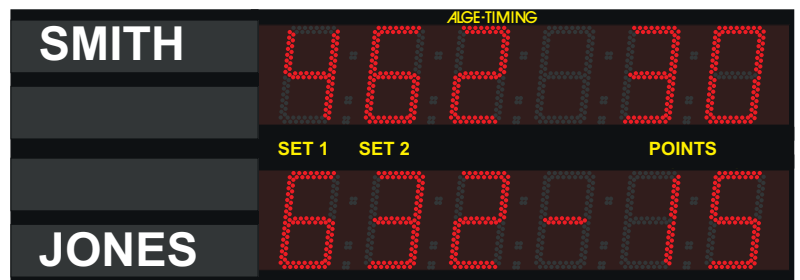

Figure Height: 45 cm
Max. readability: about 200 m
Score: 5 sets

Tennis Scoreboard D-TA815-T415:

Figure Height: 15 cm
